ATTN: Application Log in  
7900 Hickman Rd., Suite 1  
Urbandale, IA 50322

# IOWA DNR Air Construction Permit Application

**Form CE3** Control Equipment Information for Wet Scrubbers  
Please see instructions on the reverse side

<b>Company Name</b>				
1) CE Number ID:				
2) Emission Point(s) ID:				
3) Manufacturer:			4) Model Number:	
5) Type of Scrubber : <input type="checkbox"/> Packed Bed <input type="checkbox"/> Spray Chamber <input type="checkbox"/> Venturi <input type="checkbox"/> Other _____				
6) Total Liquor Flow Rate (gallons per minute) :				
7) Recycled Liquor Flow Rate (gallons per minute) :				
8) Normal Liquor pH :				
9) Pressure drop across Scrubber (in H <sub>2</sub> O):				
10) Date of Construction:				
11) Date of Modification:				
12) Capture Hood involved: <input type="checkbox"/> Yes <input type="checkbox"/> No				
13) Capture Hood Efficiency (percentage):				
14) Date of Hood Installation:			15) Date of Hood Modification (if any):	
<b>16) Pollutant Controlled</b>				
	<b>PM</b>	<b>PM<sub>10</sub></b>	<b>VOC</b>	<b>Other(     )</b>
<b>Control Efficiency</b>				
17) If manufacturer's data is not available attach a separate sheet of paper (labeled CE3-17A) to provide the control equipment design specifications and performance data to support the above mentioned control efficiency.				

## Instructions for Form CE3

**This form is used by the DNR to identify the control equipment and the emission point (stack or vent) used for the emission unit(s) proposed in this permit application. This form also asks for supporting documents to verify stated control efficiencies of the control equipment. Additional information may be requested.**

Please put your company name in the box provided. This is useful if application pages are separated.

**STACK/VENT (EMISSION POINT) SPECIFICATIONS:**

IF YOU HAVE MULTIPLE PIECES OF CONTROL EQUIPMENT THAT VENT FROM ONE EMISSION POINT, ATTACH A FORM CE FOR EACH PIECE OF CONTROL EQUIPMENT.

1. Provide the name of the control equipment used (for example: pulse jet baghouse, ESP, dust collector, etc.). Identify the control equipment by a number. This number should be the only number to represent this control equipment on other forms which are included in this application and in other permit applications.
2. Provide the ID number of the emission point. An emission point is the same as a stack or vent. The number should be consistent with numbers provided on previous and future permit applications including operating permits.
3. Provide the manufacturer of the control equipment (if known). If custom, provide engineering specifications.
4. Provide the model number of the control equipment (if known). If custom, provide engineering specifications.
5. Indicate the type of scrubber.
6. Provide the total liquor flow of the scrubber.
7. Provide the recycled liquor flow of the scrubber.
8. Provide the pH of the liquor fed to the scrubber.
9. Provide the pressure drop across the control device. Use either measured data or manufacturers' data.
10. The date of construction of the control equipment is the date, month, and year in which construction or modification begins as defined in EU Form Instruction item 7.
11. If the control equipment has been or will be modified, give the date, month and year of the most recent or future modification.
12. Indicate whether there is a capture hood associated with the emission unit by answering "yes" or "no."
13. If there is a capture hood, write down its capture efficiency, if known. If unknown, leave blank.
14. Provide the date the capture hood was installed or will be installed at the emission unit(s).
15. If the capture hood has been or will be modified, write the month and year of the modification.
16. If you have supporting documentation for the control efficiency(s) of the control equipment, mark the type of documentation, either manufacturer's data or a stack testing report. Manufacturer's data can include a manufacturer's guaranteed emission rate or guaranteed control efficiency. Attach the supporting documentation and label this attachment CE3-17A. Then, list the pollutant and provide the estimated or proven control efficiency for the control device on this form. If the control equipment will be controlling more than one pollutant at this emission unit, list all pollutants and the corresponding control efficiencies.
17. If you do not have the documentation requested in box (16), provide other documentation for the control efficiency such as calculations or design data or other reference document. Attach a separate sheet labeled CE3-17A.
